SURESH PARIMI

AI QUALITY ENGINEERING LEADER | LLM VALIDATION | AGENTIC TESTING | HEALTHCARE & REGULATED SYSTEMS

Amsterdam, Netherlands | +31 6 16270233 | reachparimi@gmail.com | linkedin.com/in/sparimi
EU Work Authorisation — Netherlands | English (Fluent)

PROFESSIONAL SUMMARY

AI Quality Engineering leader with 19+ years of hands-on Quality Engineering, automation architecture, release governance, and enterprise technology delivery experience. Designs and implements validation frameworks for LLM-powered and multi-agent systems while maintaining deep experience in healthcare technology, regulated workflows, and enterprise platforms.

Hands-on practitioner in AI-native quality engineering, combining deterministic testing, LLM evaluation, Human-in-the-Loop validation, agentic automation, workflow testing, regression validation, release readiness, and production quality assurance.

Healthcare and regulated-domain experience spans Crossover Health patient and clinician workflows, Pfizer compliance and regulated technology validation, earlier healthcare IT engagements at Emids, and formal experience with IEC 62304, ISO 13485, FDA 21 CFR, SOX/ITGC, and risk-based quality engineering.

CORE CAPABILITIES

- AI Quality Engineering Strategy
- AI Validation & Prompt Testing
- Agentic & AI-Assisted Testing
- Runtime Quality & Reliability
- Release Validation & Go/No-Go
- Custom Quality Metrics
- LLM & Multi-Agent Evaluation
- Healthcare Workflow Validation
- HITL Quality Controls
- Observability & Evaluation Tracing
- Regulated Systems Validation
- Technical Leadership & Mentoring

PROFESSIONAL EXPERIENCE

PostNL | Amsterdam, Netherlands
Jan 2026 – Present

Automation & AI Evaluation Lead — Conversational AI Platform (Contract)

- Defined the AI Quality Engineering strategy for a production multi-agent Conversational AI platform spanning RAG, KMS, email automation, MCP tool-calling, Salesforce AgentForce, Claude, GPT-4o, and AWS Bedrock.
- Designed custom evaluation metrics for RAG faithfulness, answer relevancy, agent routing accuracy, tool-call correctness, workflow outcomes, and end-to-end response quality.
- Built automated evaluation harnesses combining deterministic validation, LLM-as-a-Judge techniques, Ragas, DeepEval, promptfoo, LangSmith, and Langfuse to detect behavioural regressions before release.
- Implemented Human-in-the-Loop validation to identify intent misrouting, workflow failures, tone issues, and tool-call errors not reliably detected by automated metrics.
- Introduced agentic testing workflows where AI agents read Jira acceptance criteria, generate tests, produce executable Playwright automation, and execute against live systems.

Canon Europe | Amstelveen, Netherlands
Nov 2023 – Jan 2026

Test / Release Manager | Automation Architect | AI Evaluation Lead

- Architected and personally implemented a Playwright automation framework across Salesforce, ERP, BI, CPQ, and Contract Management platforms, reducing regression cycles by 75% from 12 days to 3.
- Built AI-assisted and agentic test automation pipelines transforming Jira acceptance criteria into test cases, executable Playwright code, and automated execution.
- Engineered an MCP-based testing toolchain using Microsoft's Playwright MCP and custom FastAPI MCP servers.
- Led AI evaluation initiatives and introduced AI-enabled testing practices across the QA organization, mentoring 6–8 engineers.
- Owned release readiness, Go/No-Go decisions, risk assessment, cutover sequencing, rollback execution, defect triage, and production incident response, achieving zero critical production incidents over 26 months.

Dolby US (via Andela) | Remote
Feb 2022 – Oct 2023

Automation Test Manager (Contract)

- Standardised Playwright, Cypress, and Appium across web and mobile platforms through hands-on reference implementations and scalable automation practices.
- Applied BrowserStack AI for intelligent test-result clustering, reducing defect triage time by 40%.
- Led a 10-person distributed QA organization and mentored senior engineers into technical leadership roles.

Crossover Health
Aug 2021 – Jul 2022

Automation Test Engineer — Healthcare Workflows

HEALTHCARE EXPERIENCE: Patient journeys | Clinician workflows | Salesforce healthcare processes | CI/CD validation

- Designed and implemented an automation test framework for healthcare workflows connecting patients, doctors, and clinical operations.
- Built end-to-end automated tests for patient and clinician journeys across web applications and Salesforce-based healthcare workflows.
- Developed reusable Playwright and TypeScript automation components to validate functional workflows, user journeys, integrated systems, and regression scenarios.
- Integrated automated tests into GitLab CI/CD pipelines to support continuous testing, regression validation, and release readiness.
- Worked with healthcare application and business teams to validate patient-facing and clinical processes across integrated systems.

Pfizer (via NewPage Solutions) | Remote
Apr 2020 – Feb 2022

Engineering Test Manager (Contract)

REGULATED LIFE SCIENCES EXPERIENCE: Compliance validation | ITGC | Risk-based testing | Regulatory workflows

- Designed and implemented automated compliance validation workflows, eliminating 60% of manual ITGC and Segregation of Duties checks.
- Built API and UI automation integrated into Jenkins and GitHub Actions, reducing validation feedback on critical regulatory workflows from three days to under four hours.
- Led risk-based validation across regulated enterprise workflows and served as the primary quality stakeholder in regulatory review meetings.

Epsilon (Publicis Groupe) | Bangalore, India
Apr 2019 – Apr 2020

Test Lead

- Delivered C# and Selenium automation frameworks for web and API testing across Agile enterprise release cycles.

JRD Systems at Gordon Food Services | Grand Rapids, US
Dec 2014 – Apr 2019

Functional & Automation Test Manager

- Owned end-to-end QA strategy for ERP and supply-chain workflows serving 500+ internal users.
- Built Java, Selenium, and REST Assured automation covering 300+ test cases, improving release cadence from quarterly to monthly.

Earlier Career — Infosys, T-Mobile, Canon, Syntel, Tech Mahindra, Emids
2006 – 2014

QA Lead and Consultant

HEALTHCARE EXPERIENCE: Healthcare IT engagements including Emids | Regulated systems | Enterprise workflow validation

- Built Quality Engineering capabilities across healthcare IT, financial services, telecom, payments, AML transaction monitoring, SWIFT/SEPA reporting, and enterprise systems.
- Validated payment flows, settlement cycles, reconciliation, transaction screening, regulatory reporting, transaction routing, and audit trail integrity.

HEALTHCARE & REGULATED DOMAIN EXPERIENCE

Crossover Health: Patient-to-doctor and clinical workflow automation across web and Salesforce-based healthcare systems using Playwright, TypeScript, and GitLab CI/CD.

Pfizer: Automated compliance validation, ITGC and Segregation of Duties controls, regulatory workflow testing, and risk-based quality engineering.

Emids and earlier healthcare IT engagements: Healthcare technology quality assurance and enterprise application testing.

Regulatory & Quality Knowledge: IEC 62304, ISO 13485, FDA 21 CFR Part 820, SOX/ITGC, risk-based testing, release validation, and audit-oriented quality controls.

TECHNICAL SKILLS

AI Quality Engineering: Ragas, DeepEval, promptfoo, LangSmith, Langfuse, HITL frameworks, LLM-as-Judge, custom metric development, AI evaluation harnesses

AI & Agentic Systems: Claude, GPT-4o, AWS Bedrock, Cognigy.AI, Salesforce AgentForce, RAG, MCP tool-calling, Playwright Agents, custom FastAPI MCP servers

Automation: Playwright, Cypress, Selenium, Appium, REST Assured, Java, JavaScript, TypeScript, Python, C#

CI/CD & Delivery: GitLab CI/CD, Azure DevOps, Jenkins, GitHub Actions, release validation, defect management, incident response

Domain: Healthcare Workflows, Healthcare IT, Life Sciences, IEC 62304, ISO 13485, FDA 21 CFR, SOX/ITGC, Payments, AML, SWIFT/SEPA, Core Banking, ERP

CERTIFICATIONS & TRAINING

ISTQB-CTFL | APRP (Accredited Payments Risk Professional) | IEC 62304 | ISO 13485 | FDA 21 CFR Part 820 | Financial Crime Specialist (CFCS training) | Engineering Leadership in Quality | Modern Web Automation with Playwright | Compliance & Governance Risk Analysis

EDUCATION

B.E., Electrical & Electronics Engineering — RGMCET, JNTU, India
